

A guide to buying IKEA appliances

# IKEA Appliances

C

All our appliances are developed to fit perfectly to our IKEA kitchen and come equipped with a variety of useful functions to make your life easier. We have a wide offer of energy-saving products, which supports you in living a more sustainable life at home. We also have sets of appliances coordinated for style and function to help you pick those that are best for you.

## Appliances you can rely on

Good kitchen appliances should fit with the people who use them, and we all have different needs, tastes and budgets. At IKEA, we work closely together with our suppliers to share our knowledge about life at home, and they share their expertise with us. Together we create appliances to rely on at prices that fit every size of wallet. To make the selection easier for you, we have categorised our appliances into different levels offering different designs, prices and functionalities.

**TILLREDA:** Simple and flexible appliances for smaller living spaces or to boost your capacity for bigger gatherings.

**LAGAN:** Basic functionalities and simple design to make life easier even when you have a limited budget.

**IKEA 300:** All the basic functionalities you need in an appliance to simplify your everyday life.

**IKEA 500:** Added functionalities to make your appliance more fun and inspiring, and household work easier.

**IKEA 700:** All the functionalities you need – and then some, so you can thrive with your appliance. Above and beyond in innovation and design.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN, 2 year).

## Find your ideal set of appliances

Row

Getting a new kitchen involves some decisions. What style are you looking for? What do you need your appliances to do? What's your budget? To make it easier for you, we have developed our appliances to fit perfectly together as well as with our kitchens. You'll find more information about every individual appliance on the following pages.

20

## **Basically everything you need**

In the LAGAN series you have all the basic functions you need at a price you won't believe. The design is clean and LAGAN oven, extractor hood, hob and fridge/ freezer all match each other perfectly. All coordinated for a great kitchen experience. You have everything at hand for everyday cooking and baking with everything at hand, all with a 2-year guarantee.

LAGAN induction hob plug-in 2 zones, black. 505.061.01

## Plug in and cook!

TILLREDA appliances are easy to use and very easy to place, with a plug-in/plug-out feature that makes them especially suitable for small-sized kitchens.

The induction hob heats up fast and is highly energyefficient – plus it's easy to stow away or hang on the wall to free up counter space for other activities. The handy microwave oven is easy to place just about anywhere. There's no handle – just push to open. A perfect option when there is no space for a built-in microwave.

And a small fridge for a small-sized kitchen. Also handy in the den, basement, guest house, dorm room or wherever you may want quick access to a beverage or snack.

## Everyday cooking made easy – and more efficient

The appliances in this set offer all the functions you need for everyday use along with a clean and simple design that make them easy to understand and use.

LAGAN oven in stainless steel brings a classic, timeless look to your kitchen while the quick and energy-effi-

cient MATMÄSSIG induction hob will have you cooking meals to perfection in no time.

RYTMISK is a timeless stainless steel hood with all the basic functions needed. A LED light source gives even work lighting on the entire worktop.

RYTMISK wall mounted extractor hood, stainless steel. 003.923.24

MATMÄSSIG induction hob, IKEA 300, black. 104.670.93

## Modern, in every sense of the word

The appliances in this set called MATÄLSKARE have all the functions a modern kitchen should have.

It includes everything from forced air in the oven helping you to cook several dishes at the same time, to LED strip lighting in the extractor hood that illuminates the entire hob effectively. Combine this set with MATMÄSSIG induction hob, which can save up to 40% energy and 50% of your cooking time.

MATMÄSSIG induction hob, IKEA 300, black. 104.670.93

### The best from two worlds

To enjoy a classic styled kitchen doesn't mean you have to settle for old-fashioned appliances. MATTRADITION offers you both.

You can cook or bake several dishes at the same time without flavours spreading between them in the forced air oven, and the low noise level from the extractor hood allows you to have a normal conversation while cooking.

Add an energy-efficient GRUNDAD induction hob to bring your cooking to perfection and enjoy a tasty end result.

MATTRADITION forced air oven, IKEA 300, white. 804.118.75

MATTRADITION microwave oven, IKEA 300, white. 704.119.08

MATTRADITION wall mounted extractor hood, stainless steel. 603.688.11

VILSTA induction hob 59, IKEA 300, black. 905.577.25

## Classic elegance on the outside, extra everything on the inside

A classic set of appliances filled with great cooking functions! This is a perfect combination for you who like to cook and bake.

The ANRÄTTA forced air oven has a pyrolytic cleaning function burning grease and food residue to ashes.

The flexible bridge zone on the SMAKLIG induction hob adapts to different pot shapes and sizes and the angled BEJUBLAD extractor hood makes the area around the hob more accessible.

ANRÄTTA forced air oven with pyrolytic function, IKEA 700, stainless steel.

705.178.77

BEJUBLAD wall mounted extractor hood, white. 803.319.11

SMAKLIG induction hob, IKEA 500, black. 504.678.83

## A high-end kitchen with self-cleaning

With clean lines and a modern expression, KULINARISK forced air oven with pyrolytic function and microwave combi oven are some of our high-end, most innovative appliances.

The self-cleaning function makes it easier for you to clean the oven, as grease and food residue are burned to ashes that can be easily brushed off.

Together with FÖRDELAKTIG induction hob with integrated extractor this set is a great choice for the home chef. The extractor hood automatically adjusts to the heating level on the hob – the higher the heat, the more powerful the extraction capacity.

FÖRDELAKTIG induction hob/integrated extractor 60, IKEA 500, black. 503.348.54

## A gourmet kitchen for the food lover

FINSMAKARE is a super modern set with all the functions you could think of. The oven has a steam function which retains the food's taste and nutrients, keeping it moist and full of flavour.

With the oven's self-cleaning pyrolytic function you just press a button to burn away grease and remaining

food. The angled fan makes the area around the hob more accessible.

And, talking about HÖGKLASSIG the fast and energy saving induction hob: the flexible zones adapt to your pots and pans. All in all, a great choice for you who loves to cook.

## **Big cooking in a small space**

Make the most of the space you have with TILLREDA microwave oven. Place anywhere, plug-in and cook. Preparing food couldn't be easier. The neat and functional microwave oven makes a small cooking space feel like a big kitchen, and it comes with a 2-year guarantee.

## Ovens

Whatever cooking (or kitchen) style you have, we have an oven for you! Offering a wide range of functions – everything from basic warming to steam cooking, making every cooking experience easier and more fun – they are also developed to fit perfectly in your IKEA kitchen. Simply choose the functions that suit the way you cook, and we will meet you with a matching look.

#### When choosing an oven, consider the following:

#### 01

How often do you use your oven, and for what kind of food? We have everything from very simple, easy-to-use ovens to more advanced with lots of different functions.

How much food do you cook at the same time? Our ovens come in sizes from 56 to 77 litres. 03

What style do you prefer? No matter if your kitchen goes in a more modern or classic style, we have ovens that will match perfectly.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

#### Tips

**Did you know** that telescopic rails make cooking a lot simpler, and safer? To load and unload food without getting burned is a piece of cake as you get a better grip on the ovenware – when using oven gloves, that is. And it'll be a snap to pull out the food to check the temperature, stir or adding too.

**Are you aware** that you can clean the oven and keep it as new with close to zero effort from your part? With the self-cleaning pyrolytic function you heat up the oven to burn all grease and food residue to ashes. All you have to do is wipe it out afterwards.

## Types

#### Conventional ovens

Ideal for you who wants an easy to use oven, including top and bottom heat and all the basic functions you need for cooking and baking.

#### Forced air ovens

Ideal for you who loves to cook. A fan spreads the heat fast and evenly, letting you cook different dishes at the same time without mixing flavours.

## Forced air ovens with self-cleaning/ pyrolytic function

Ideal for you who love to cook but not to clean. These ovens have the same functions as forced air ovens, plus they're easy to keep clean. Just press a button to burn grease and food residue to ashes and wipe it out with a clean cloth.

## Forced air ovens with steam function

Ideal for you who love to cook healthy food. This type of oven has the same functions as forced air ovens, but with the addition of the steam function. The combination of steam and heat retains more taste and nutrients, while making the food soft and moist on the inside and crisp and brown on the outside.

## **Key features**

**Spacious inner dimensions** with up to 5 cooking levels ensure you have plenty of room for your food. Choose between ovens with volumes ranging from 43 to 77 litres.

**Telescopic rails** let you load and unload food without getting burned as you get a better grip on the ovenware. Pull your food out to fast and steady check the temperature, stir or adding.

Get the roast just right every time using the integrated **meat thermometer** with temperature sensor.

A built-in modern-looking  ${\bf clock}$  is ideal for keeping an eye on the time while you're cooking.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

With **pre-set cooking programs** you can choose the proper setting for different food, dishes and recipes – and get the same yummy result every time.

Our oven doors have a **child safety lock** to make it safe for kids to be in the kitchen and take part in all the activities.

### Programs

**Top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

The **steam cleaning** releases burns, grease and food residue to easily wipe off with the included sponge.

The **direct steam** function gives the bread you are baking a golden-brown crispy surface and makes it soft inside, and the food you cook ends up being more juicy.

The special **pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The fan forced air convection spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

**Full-steam function** helps retain vitamins, minerals and nutrients of food. Moisture is not lost, and the flavours are locked in.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, as well as a nice golden-brown colour on your gratins.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

The **self-cleaning pyrolytic** function makes it easier for you to clean the oven. Grease and food residue are burned to ashes that you easily clean out with a cloth.

With the **combined steam** function you combine steam and hot air to get optimal humidity and heat levels, keeping food soft and moist on the inside, and crisp and brown on the outside.

The **bread/pizza baking** function gives your food a more intense brown outside and a mouth-watering crispy bottom.

The fast **quick pre heat** function warms up the oven quickly.

Thaw your food seven times faster using the **quick defrost** function.

FORNEBY Forced air oven with direct steam IKEA 500, stainless steel colour, 305.569.03.

## Microwave ovens

Microwave ovens aren't what they used to be. In fact, they've become much better – a wide range of functions lets you grill, bake, steam and crisp, apart from defrosting and reheating. What's more, the combination of forced air and microwaves in our microwave combi ovens reduces both cooking time and energy consumption. Being a microwave oven and regular oven in one, it's a practical choice for smaller kitchens, or if you cook a lot of food and need an extra oven.

## When choosing a microwave oven, consider the following:

01

#### 02

How often do you use your micro, and for what kind of food? We have everything from very simple, easy-to-use micros to more advanced microwaves/microwave combi ovens with lots of different functions. How much food do you cook at the same time? With a microwave combi oven you can have all in one or get an extra oven when the big family comes to visit.

#### 03

What style do you prefer? No matter if your kitchen goes in a more modern or classic fashion, we have micros that will match perfectly.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

#### Sustainability

Oven cooking doesn't have to take ages, or use lots of energy. With our microwave combi ovens, you get a forced air oven and a microwave oven all in one. It means faster baking, grilling and roasting, as well as quick defrosting and warming. Less time waiting around and more time enjoying great home cooking with the people you love.

#### Tips

**Did you know** that cooking time is significantly shortened if you combine the micro function with forced air in a microwave combi oven, compared to an ordinary oven? The combination allows you to get a perfect result every time, while saving both time and energy. **Are you aware** that placing a built-in microwave in a high or wall cabinet, is a smart use of space – but also a way to create an ergonomic and smooth workflow that's just right for you.

## Types

#### Microwave ovens

Ideal for you who fast and easily want to heat up or thaw food and beverages. Some of our microwaves have the grill function that allows you to cook thin cuts of meat and vegetables or to brown gratins and steaks. Some of our models also include a crisp function allowing you to cook food.

#### Microwave combi ovens

This is a microwave oven and forced air oven in one, ideal for you who hunger for versatility but don't want two conventional ovens. You can use it as a microwave oven for quick warming or defrosting and as an oven for grilling, baking and roasting. Even better, you can combine both to save time and energy – without compromising the taste.

# **Key features**

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you're cooking. Use the timer when you want total control over the cooking time.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

**Anti-finger print finish** makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

Our oven doors have a **child-safety lock** to make it safe for kids to be in the kitchen and take part in all the activities.

The safety lock keeps children from accidentally turning the oven on. It activates automatically (1 minute after the microwave oven returns to stand-by mode), which means the control panel cannot be used unless you open and close the door.

# **Microwave programs**

The **crisp** function allows you to bake pizza, pie and other dishes faster than in an ordinary oven. The function is also great for frying food such as eggs, bacon, sausages and hamburgers.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, or a nice golden-brown colour on your gratins.

In a hurry? Use the **quick start** to heat up your food and beverages in a jiffy.

Thaw your deep-frozen food faster. The **defrost** function is ideal for meat and poultry, fish, vegetables and bread.

## **Oven programs**

**Top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

The **bread/pizza baking** function gives your food a more intense brown outside and a crispy bottom.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes at once without flavours spreading between them.

With **pre-set cooking programs** you can choose the proper setting for different dishes and recipes – and get the same yummy result every time.

## **Microwave ovens**

## **TILLREDA**

Usable volume: 43 litres. W59.4×D56.7×H45.5 cm.

# The winner of the Red Dot Design Award

A microwave and oven in one! Touch control and other smart functions make cooking easier – every day. Matches with other appliances in the FINSMAKARE series.

# Hobs

A cook's best friend, the kitchen hob is central to everyday cooking. Our energy-saving induction hobs deliver fast and precise cooking results, are very easy to use and include all the functions you may need. Each has its own unique features and a variety of sizes – choose between one to several flexible zones – to perfectly suit your kitchen and your cooking style.

## When choosing a hob, consider the following:

## 01

## 02

How often do you use your hob? We have everything from mobile onezone hobs to high-end gas and induction hobs. How much food do you cook at the same time? You can choose to have a small hob with 1 or 2 zones to extra wide hobs for large pots and pans. 03

What type of chef are you? If you're the one who wants total control choose an induction or gas hob. You can also choose hobs with flexible zones, which adapts to the shape of the pot or pan.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

## Not all zones can be used simultaneously at high power

The cooking zones are paired into 2 groups (left or right), each which is connected to a phase with a maximum power supply. If you are using more than one zone connected to the same phase, a power management system kicks in to ensure they do not exceed the maximum power supply. This means that the power of the previously activated cooking zone will be reduced. If you want maximum power in two pans, they need to be in opposite groups.

## Whats's that noise?

When your induction hob makes noises, it is perfectly normal. You may hear a low humming sound, whistling or ticking. It is all part of the induction technology and simply means your hob is doing its job. If you are curious, have a look in the user manual and get acquainted with the different types of noises and why they occur.

## Sustainability

Save time and energy while you cook!

Like to cook but don't always have enough time? Induction hobs heat up your pots and pans in a super efficient way. That means faster cooking and more time to sit and enjoy great home cooked meals with family or friends. Because induction hobs only heat your cookware, they use less electricity and they're safer.

# Types

## Induction hobs

Induction hobs are up to 50% faster and 40% more energy efficient. With just one touch you can select features and regulate the heat in an instant.

## Induction hob with integrated extractor

With an integrated extractor there's no need for a hood over the cooking area – perfect for a kitchen island, giving you an overview. The integrated extractor automatically adjusts the extraction capacity to the heating level on the hob.

## Gas hobs

Gas hobs are more than a professional-looking feature for ambitious cooks, they provide quick heat control needed for searing and frying.

## Induction hobs key features

A **portable** hob is perfect for smaller kitchens or wherever you need an extra cooking zone. It's easy to move around and can be stowed away when not in use to free up counter space for other activities. Just plug it in wherever you need it.

Depending on your needs and how much food you cook at the same time, choose a hob with **enough cooking zones.** We have hobs with 1, 2, 3, 4 and 5 zones. Also think about the width of the hob: the bigger the hob is, the more space you'll have for pots and pans.

When you press the **pause** function, all activated zones are paused – and when you press the pause button again, the zones will come back to the same temperature as before. That way you can suspend the cooking process if you're interrupted, and re-start again in an instant.

When you press and hold the **child lock** button, you can't start the hob or change the temperature. To unlock the hob, press the child lock button again for 4 seconds. This is also a good function to use when you're cleaning the hob surface and don't want to switch on any zones.

Get excellent control when you cook with the **individual timers** allowing you to time each zone separately. Ideal for boiling eggs, rice or pasta.

The **touch and press control panel** allows you to regulate the heat easily and precisely by just touching the + and – symbols.

Just slide your finger on the **touch and slide control panel** and the heat will adjust accordingly. With just one touch you can select features and regulate the heat in an instant.

An integrated extractor gives you a good overview since there is no hood over the cooking area. It adjusts automatically to the heating level on the hob – the higher the heat, the more powerful the extraction capacity.

The **bridge** function gives you the flexibility to use larger and different pots for special recipes or occasions as it allows you to connect 2 cooking zones into 1 large one when needed.

Vary the cooking surface by using the **flexible heating zones**. You can use them together or separately, and adapt them to pots and pans in different shapes and sizes.

The **power booster** delivers additional power to a single cooking zone, perfect for boiling water. The booster can be set with just one touch.

If you like cooking, you'll love the **pre-set cooking mode**. Adjust to low, medium or high heat simply by moving the pot or pan on the multi-flex zone. The hob will remember the power settings next time you activate the function.

## Induction hobs

## TILLREDA

Portable induction hob 1 zone

# A stylish focal point

A sturdy cast iron gas hob is a strong style statement in any type of kitchen.

> **SKÅLAN** IKEA 500 gas hob. 005.234.19

# Extractor hoods

An extractor hood helps keep your kitchen air clean and free from smells, steam and grease. Our models now come with different air caption capacities, which means they have all been optimised to only extract the air that needs to leave the house, while keeping warm or cool air inside. And since an extractor hood is also an important visual element in any kitchen, we have a wide range of wall-mounted, built-in, or ceiling-mounted models to suit different room settings and needs.

## When choosing an extractor hood, consider the following:

01

wider.

02

How wide is your hob? What does your kitchen The width of the hood look like? If you have an open plan in your home, should be as wide or make sure to choose a hood with low noise level. 03

Valve or charcoal filter? Find out if you can connect the extractor hood to a valve that leads the air out of the building. If not, you need to connect the extractor hood to a charcoal filter, which takes away the grease and odour from the air and lets it out in to the room again.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

## Sound levels

Sound levels for appliances are measured in decibels (dBs). Our extractor hoods have been tested in speed 3 to determine the dB level.

The sound level of your extractor hood is affected by:

- **Type of installation.** Exhaust-mode or recirculation-mode.
- Length and diameter of the exhaust pipe between extractor and exhaust vent. The longer it is and the smaller the diameter, the louder it gets.
- **90° bends.** The more bends you have in the exhaust pipe, the greater the sound.

Decibel levels are listed in the product information so you can compare and choose the hood that's suitable for your needs and comfort.

## **Tip/awareness**

Every 6 dB-increase in sound will double the perceived sound level. In other words, 66 dBs is perceived as twice as loud as 60 dBs; and 72 dBs is perceived as 4 times louder than 60 dBs.

# Types

## Built-in extractor hood

If you want a completely uniform and streamlined kitchen, choose a built-in extractor hood with a front that match the rest of your kitchen.

## Wall-mounted extractor hoods

Our wall-mounted extractor hoods come in many shapes, styles and sizes. Choose a unique piece or one that match the rest of your appliances and the kitchen. Just make sure it has the same size or is wider than your hob for optimal performance.

## Ceiling-mounted extractor hoods

A ceiling-mounted extractor hood is the perfect solution if you have the ability to cook food on a kitchen island.

## Tips

**Did you know** that turning on the extractor hood 5 minutes before you start cooking will make it work more efficiently? Turning it on will circulate the air and allow the extractor hood to more effectively catch cooking odour and draw it directly into the fan. It is also a good idea to let the extractor hood run for 10 to 15 minutes after cooking allowing it to absorb residual particles in the room.

# **Key features**

All our extractor hoods have energy efficient **LED lighting**. This type of lighting normally lasts as long as the extractor hood does, and it illuminates the entire hob to make cooking easier.

When you cook a lot of food and the smoke is thick in your kitchen, the **booster** function will come to your rescue. It has a higher speed than max speed and can be turned on for maximum 6 minutes to dissolve heavy cooking fumes.

With **dimmable lighting** you decide how strong the light on your hob should be. Choose a stronger light when cooking, and a cosy mood light when eating.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

**SVÄVANDE** Ceiling-mounted extractor hood. Stainless steel. 105.178.80

# Powerful AND quiet? Quite so.

With our low noise extractor hoods, kitchen conversations can be kept at a comfortable level.

## **Built-in extractor hoods**

## LAGAN 🕕

Wall mounted extractor hood

## White. 304.013.98

A kitchen hood with LED lighting and all the basic functions you need. Can be mounted in a wall cabinet for a uniform look in the kitchen. Combine with LAGAN oven and LAGAN hob.

#### Key features

- LED lighting
  - Booster function
  - ) Dimmable lighting
  - ) Touch control

#### Technical information

Energy class: D (from E to A++). Extraction rate in exhaust mode: 273 m<sup>3</sup>/h. Noise level at max exhaust speed: 71 dB (A). Extraction rate in recirculation mode: 75 m<sup>3</sup>/h. Noise level at max recirculation speed: 71 dB (A).

Installation For ducted installation: Please use NYTTIG TUB 125. For recirculation installation: Please use charcoal filter NYTTIG FIL 900.

#### Measurements

Width: 60.0 cm. Depth: 51.0 cm. Height: 13.0 cm. Cord length: 1.3 m. Motor power: 115W.

## LAGAN C

Stainless steel. 203.923.23

A kitchen hood with LED lighting and all the basic functions you need. Can be mounted in a wall cabinet for a uniform look in the kitchen. Combine with LAGAN oven and LAGAN hob.

## Key features

LED lighting
 Booster function
 Dimmable lighting
 Touch control

## Technical information

Energy class: C (from E to A++). Extraction rate in exhaust mode: 322 m<sup>3</sup>/h. Noise level at max exhaust speed: 73 dB (A). Extraction rate in recirculation mode: 116 m<sup>3</sup>/h. Noise level at max recirculation speed: 77 dB (A).

## Installation

For ducted installation: Please use NYTTIG TUB 125. For recirculation installation: Please use charcoal filter NYTTIG FIL 900.

### Measurements

Width: 60.0 cm. Depth: 51.0 cm. Height: 13.0 cm. Cord length: 1.3 m. Motor power: 115W.

## UTDRAG Built-in extractor hood

Stainless steel. 903.923.29

Prefer a hidden hood? UTDRAG built-in extractor hood with LED lighting is mounted almost invisibly in a wall cabinet. You start it and adjust the extraction area by pulling out the hood's lower part.

#### Key features

- ✓ LED lighting
  - ) Booster function
  - Dimmable lighting
  - ) Touch control

#### Technical information

Energy class: B (from E to A++). Extraction rate in exhaust mode: 340 m<sup>3</sup>/h. Noise level at max. exhaust speed: 67 dB (A). Extraction rate in re-circulation mode: 140 m<sup>3</sup>/h. Noise level at max. re-circulation speed: 72 dB (A).

#### Installation

For ducted installation: Please use NYTTIG TUB 150. For recirculation installation: Please use charcoal filter NYTTIG FIL 120. For this installation also NYTTIG TUB 150 is required.

#### Measurements

Width: 59.9 cm. Depth: 38.7-64.4 cm. Height: 21.5 cm. Cord length: 1.0 m. Motor power: 110W.

Stainless steel. 503.923.26

Ceiling-mounted extractor hood

Stainless steel. 305.178.79

The spice rack and rails for hanging utensils clears up space on the worktop and inspires cooking. The large extraction area suits larger hobs and a dimmable LED lighting strip gives even light.

#### **Key features**

- $\oslash$ LED lighting
- $\oslash$ Booster function
- Dimmable lighting Õ
- Touch control

#### **Technical information**

Energy class: A++ (from E to A++). Extraction rate in exhaust mode with booster function: 813 m<sup>3</sup>/h. Extraction rate in exhaust mode: 437 m<sup>3</sup>/h. Noise level at max exhaust speed: 59 dB (A). Extraction rate in recirculation mode: 296 m<sup>3</sup>/h. Noise level at max recirculation speed: 67 dB (A).

Installation For ducted installation: Please use NYTTIG TUB 150. For recirculation installation: Please use charcoal filter NYTTIG FIL 440. For this installation also NYTTIG TUB 150 is required.

#### Measurements

Width: 90.0 cm. Depth: 60.0 cm. Height in exhaust mode: 104.0-131.0 cm. Height in recirculation mode: 104.0-131.0 cm. Width of chimney: 27.7 cm. Depth of chimney: 27.8 cm. Cord length: 1.3 m. Motor power: 160W.

#### **Extractor hood accessories**

#### **Charcoal filters**

Our charcoal filters effectively absorb smell of cooking when the air is recirculated. By washing the charcoal filter approximately every three months, it can be reused and maintain its functionality for about 2-3 years.

# Fridges and freezers

Yes, an IKEA fridge or freezer keeps your food fresh for longer, but they do so much more to help make your life a little nicer. There are plenty of features for storing and enjoying your food in the best way possible—like, a chill mode for glass bottles, fan cooling for consistent temperatures, electronic displays for settings and functions, and fast freezing (just to name a few).

## When choosing fridges and freezers, consider the following:

#### 01

02

How much food do you normally store in your fridge and/or freezer. How many are you in the family? How often do you shop? We have different sizes and capacities to choose between. Do you need any specific function or accessories to simplify storing and organising your fridge/ freezer? We can offer interiors for every need.

#### 03

What style do you prefer and what works in your kitchen? Choose between freestanding appliances creating a design statement in your kitchen, or integrated adding to a streamlined and uniform look.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

#### Sustainability

Did you know that approximately a third of all food produced in the world is not eaten? That's like dumping every third bag of groceries straight into the bin! IKEA fridges and freezers are full of smart ideas to help you keep food fresh and tasty longer. By reducing food waste, you are saving money and time spent shopping.

#### Tips

**Did you know** that you can keep your food fresh for longer with an in-built fan? The fan circulates the cool air and keeps the temperature consistent throughout the whole fridge. And as the temperature is the same everywhere, you can store your food and beverage exactly where you want it. **Did you know** that defrosting and scraping ice is nothing but a bad memory? The no frost function automatically regulates the humidity levels and prevents ice and frost from spreading.

## Types

#### Integrated

If you want a uniform expression, **integrate** your fridge/freezers behind the same fronts as the rest of your kitchen.

#### Integrated under worktop

If you have a small kitchen, or doesn't cook that much, you can have a convenient integrated fridge/freezer between two base cabinets **under the worktop**.

#### Freestanding

Should you prefer your fridge/freezer to be a unique piece in your kitchen, choose **freestanding** options. Plus, they hold more than integrated fridges/freezers without taking up more kitchen space.

## **Overview**

## Freestanding fridges and freezers

Usable volume: 43 litres 97/16 litres

## **Key features**

A built-in **cooling fan** spreads the air and maintains a consistent temperature throughout, allowing you to make use of the entire space and store all types of food and beverages anywhere.

The **touch control panel** makes it easy to select the right functions and temperature settings, whether you are cooling dessert, freezing fresh vegetables or going on vacation.

You'll never ever have to defrost or scrap ice again! The **no frost** function automatically regulates the humidity levels to prevent frost and ice to spread on food or in the fridge.

Integrated **LED light** technology illuminates every corner. The light source is maintenance-free, lasts the lifetime of the appliance and makes it easier for you to see what food and drinks you have.

## **Functions**

Vacation mode allows you to keep the empty fridge closed while you're away without a bad odour forming.

The **fast cooling** mode allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

With **fast freeze** you can quickly reduce the temperature to lock in the freshness and nutrients of food, even in large amounts.

With **bottle chill mode**, an alarm sounds at the end of the cool down time. Perfect if you want to chill glass bottles in the freezer or to cool food.

If the door of the appliance is not properly closed the **door alarm** will make a sound to remind you to close it.

The **temperature alarm** warns you if there is a sudden temperature increase caused by a malfunction.

## **Interior accessories**

Don't forget all the yummies in the back of the fridge! This shelf pulls out and revolves, so you can see and reach the smallest jars hiding in the back. A smart addition to your fridge or cabinet.

## Dishwashers

Our integrated dishwashers are designed to be fitted with your choice of door for a seamless match with the rest of your kitchen. The tall interiors provide generous space for dishes and there are several clever features like the delayed-start function that allows you to run the dishwasher when you want to take advantage of off-peak utility rates. There's also an AutoOpen function that automatically opens the door at the end of the cycle to improve drying performance.

When choosing a dishwasher, consider the following:

01

#### 02

How much space do you have and how many people live in the household? Our range includes dishwashers in different sizes and volumes. What specific functions are important to you? Perhaps 3 storage levels to increase the load capacity? This way you can get more dishes out of the way and enjoy a clean kitchen.

#### Sustainability

Sit down, relax and save water! Let the dishwasher do the job while you can unwind after dinner or do something else you love. A dishwasher uses less water and energy than washing dishes by hand. Simply put, you'll save both time and water while making your life at home more sustainable, too.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

#### Tips

**Did you know** that all our dishwashers are integrated? You can fit them with the same front as the rest of your kitchen to create a uniform look throughout.

**Did you know** that by running the Machine Care programme regularly, you remove limescale, grease and food remnants that that can cause odour or malfunction.

#### Sound levels

Sound levels for appliances are measured in decibels (dBs). As the operating programme influences the dB level, all our dishwashers are tested according to standard while operating the ECO programme. The dB levels are listed in the product information so you can compare and choose the dishwasher that's suitable for your needs and comfort.

#### ⊃€ 6 ันไ ไม่ 80 dB 70 dB 90 dB 60 dF ģ 000 50 dB 100 dB d: 110 dB 40 dB 30 dB 120 dB Ø<sup>₽</sup>∂ <sup>20</sup> dB 130 dB 000 OBB 10 dB 140 dB

#### Tip/awareness

Every 6 dB-increase in sound will double the perceived sound level. In other words, 66 dBs is perceived as twice as loud as 60 dBs; and 72 dBs is perceived as 4 times louder than 60 dBs.

## **Key features**

All our dishwashers are **fully integrated** to match the rest of your kitchen.

Our dishwashers have **different sizes** for different needs and kitchens. They're 45 cm or 60 cm wide, and you can choose between models with 2 or 3 levels – 3 levels hold more.

With **adjustable baskets** you can make room for plates and glasses of different sizes.

The cutlery rack at the top of the dishwasher is ideal for flatware, utensils and much more, giving you more space and flexibility.

Towards the end of the program, the **auto open** function automatically opens the door so that the dishes dry as quickly as possible.

The **mineral drying** feature uses minerals to produce heat and efficiently dry the dishes. The minerals will last over the entire lifespan of your dishwasher.

The **delayed start** function allows you to run the dishwasher when you want. Our machines have delay options from 3 up to 24 hours.

**LED lighting** in the dishwasher provides a nice and convenient light when you put in and take out the dishes.

A **XL tub** dishwasher is dimensioned for IKEA kitchens, but it has more interior space than standard tubs.

With the **beam on floor** function, a beam of light shines on your floor when the dishwasher is running.

The **time beam on floor** function projects a beam of light on the floor telling you the remaining time of the washing program.

### Programs

#### Αυτο

For all types of load – crockery, cutlery and pots and pans.

#### ECO

A more sustainable, water-saving option. For normally dirty crockery and cutlery.

#### INTENSIVE

For all types of load – crockery, cutlery and pots and pans – when they're really dirty!

#### RAPID

Perfect if you're in a hurry or have a lot of dishes. For recently used crockery and cutlery.

1 HOUR

For mixed tableware and cutlery with lightly dried-on food remnants.

#### GLASS

For delicate crockery and glassware that's not too dirty.

#### PRE WASH

This is a pre wash for very dirty crockery.

#### SILENT

Extra quiet – ideal for open plan homes or when your dishwasher is close to where you eat. For normally dirty crockery and cutlery.

#### MACHINE CARE

This program performs dishwasher maintenance by cleaning the interior of the dishwasher using hot water.

## **Additional features**

#### DRY PLUS

A higher temperature during the final rinse and an extended drying phase ensure the drying performance, even for plastics.

#### EXTRA HYGIENE

A higher temperature (70°C) for at least ten minutes during the last rinse provides an extra good hygienic and disinfecting result.

#### SAVE TIME

Shortens the washing time by up to about 66 percent, depending on the program you choose.

#### INTENSIVE ZONE

Extra intensive washing in the lower basket, perfect for very dirty dishes such as pans and baking dishes.

#### HALF-LOAD

Use this program with small loads. The running time is shortened, energy and water consumption are reduced. It is recommended to add less detergent than with a full load.

#### EXTRA SILENT

This option decrease the water pressure, therefore providing a more sensitive and silent wash.

#### POWER CLEAN

Improves the dishwashing results of the selected program by increasing the wash temperature and duration.

## Washing machines and tumble dryers

With our washing machines and tumble dryers you can you can be rest assured that your favourite clothes and special fabrics will be well taken care of. The user-friendly functions and special programs will make your laundry chores easier. Choose between a freestanding or a built-in solution that will blend in perfectly with the rest of the room.

We have washing machines with different load capacity, tumble dryers and combined washer/dryers, for your everyday laundry needs.

#### Tips

**Did you know** that our washing machines senses the amount of laundry in the drum? This allows it to adapt water volume and washing time to always wash as energy and economically efficient as possible.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

## **Key features**

#### Washing Capacity

Choose the appliance with the washing capacity that suits your laundry needs. 1 kg laundry capacity is the approximate equivalence of one full set of everyday clothes.

#### Steam function

Delicate

The steam function quickly and gently makes your laundry fresh and removes wrinkles and creases.

#### **Drying Capacity**

Choose the appliance with the drying capacity that suits your laundry needs. 1kg laundry capacity is the approximate equivalence of one full set of everyday clothes.

#### Water stop system

Water stop system detects any leakage and automatically stops water flow.

#### Maximum spin speed (RPM)

Indicates how many times the drum inside your washing machine spins per minute. Higher RPM-number equals less water remaining in your clothes when the washing cycle is completed.

#### **Delayed start**

Wash & dry 90°

Gives you the option to delay the start of your laundry to when it suits you.

Cotton 20°

### **Guarantee appliances**

Appliances have a 5-year guarantee.

#### How long is the guarantee valid?

This guarantee is valid for five (5) years from the original date of purchase of the IKEA appliance from IKEA. LAGAN and TILLREDA appliances have a two (2) year guarantee, valid from the original date of purchase. The original sales receipt is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance, or for the new parts.

#### What is covered under this guarantee?

The guarantee covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline "What is not covered under this guarantee?

#### Which appliances are covered under this guarantee?

The free five-year (5) guarantee is valid for all domestic IKEA kitchen appliances and covers defects in materials and workmanship.

#### Which appliances are not covered under this guarantee?

For appliances named LAGAN and TILLREDA, a guarantee is valid for two years from the date of purchase.

#### What will IKEA do to correct the problem?

The designated service company will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, the designated service company through its own service operations, will then, at its sole discretion, either repair the defective product or replace it with the same or a comparable product. Within the guarantee period, the costs to remedy the fault e.g. repairs, parts, labour and travel will be covered, provided that the appliance is accessible for repair without special expenditure.

On these conditions the EU guidelines (Nr. 99/44/EG) and the respective local regulations are applicable. Replaced parts become the property of IKEA.

If the designated service company repairs or replaces the appliance under the terms of this guarantee, the designated service company will re-install the repaired appliance or install the replacement, if necessary. The operation is covered if the product is easily accessible for repair. If the product is installed in a not standard built-in solution the customer has to make the product accessible before the service visit.

#### Who will execute the service?

The designated service company will provide the service through its own service operations or authorized service partner network.

#### What is not covered under this guarantee?

• Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or electro-chemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions. • Consumable parts including batteries and lamps. • Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible colour differences. • Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers. • Damage to the following parts: ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to be due to production faults. • Cases where no fault could be found during a technician's visit. • Repairs not carried out by our appointed service providers and/ or an authorised service contractual partner or where non-original parts have been used. • Repairs caused by installation which is faulty or not according to specification. • The use of the appliance in a non-domestic environment i.e. professional use. • Transportation damages. If a customer transports the product to their home or other address, IKEA is not liable for any damage that may occur during transport. However, in case of IKEA delivery of the product to the customer's delivery address, then eventual damages to the product that occurs during this delivery will be covered by IKEA, (but not under this guarantee). For claims under this last particular condition the customer should contact IKEA Customer Service at www.IKEA.co.uk

• Cost for carrying out the initial installation of the IKEA appliance. These restrictions do not apply to fault-free work carried out by a qualified specialist using our original parts in order to adapt the appliance to the technical safety specifications of another EU country.

**How country law applies:** This guarantee gives you specific legal rights, and is in addition to your statutory legal rights.

**Area of validity:** For appliances which are purchased in one EU country and taken to another EU country, the services will be provided in the framework of the guarantee conditions normal in the new country. An obligation to carry out services in the framework of the guarantee exists only if the appliance complies and is installed in accordance with: – the technical specifications of the country where the guarantee claim is made.

– the assembly and installation instructions and safety information that come with the appliance.

How to reach us for before buying if you need advice: If you have any questions about our appliances, please contact IKEA Customer Service at www.IKEA.co.uk or call 01733520006.

How to reach us if you need service support after buying: Please ring the number given in the documentation that comes with the product. To make sure that we can give you the best assistance, please read the Instructions for Use carefully before contacting us. Please also have the IKEA article number for your appliance at hand before calling us. You'll find this 8 digit number on your receipt as well as on the rating plate of the appliance.

#### Services

Our broad service offer gives you the freedom to design your own price tag by choosing not only the products that suits your budget but also deciding how much you want to do yourself and how much you want us to do for you.

Below you'll find all the services you need to plan and by your entire kitchen – and how much each of them costs. For more details about our services, talk to a co-worker at your local IKEA store or visit us at **IKEA.co.uk** 

#### Delivery

Whether you're shopping in store or online, and no matter how big the purchase, we'll do the heavy lifting and bring it to your home or business.

#### The IKEA home planner

Design the METOD kitchen of your dreams in a 3D environment and get a price on every detail as well as the total kitchen. Print out your drawings and product list at home, or save to the IKEA website. At the IKEA store you can discuss your design and get lots of advice and guidance from our kitchen experts.

Learn more at IKEA.co.uk

#### **Planning and consultation**

Even on big projects, the little things matter. Discuss your ideas with our team of design professionals and we'll help nail them down in detail.

#### More information and guidance

**IKEA kitchens buying guide** 

In this guide you'll find all the kitchen products, prices, information and help you need to make your dream kitchen a reality. Pick up a copy at your local IKEA store, or flip it through online at **IKEA.co.uk** 

#### **Planning guide**
